Is Your Home Energy Efficient?

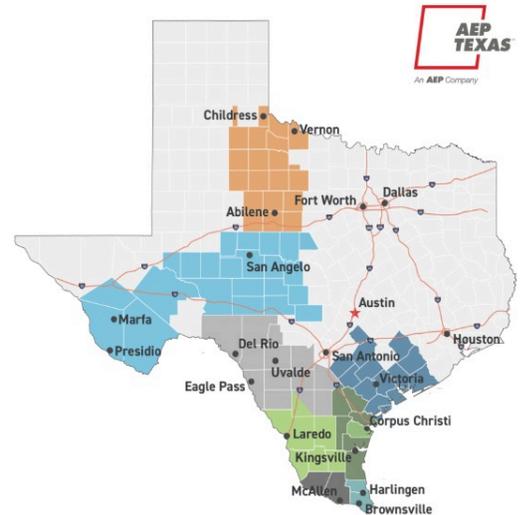

AEP Texas Residential Energy Efficiency Program

Save Energy with AEP Texas

AEP Texas Residential customers can lower their energy costs through energy efficiency programs. Upgrading your energy efficiency systems through our network of approved contractors can help reduce your electric consumption.

Follow the simple steps located below and see how your home can become more comfortable. Our incentives can help decrease the costs of these projects, and in some cases they may be even entirely free.

Interested in learning more? Contact us today and you can get started on making your home more energy efficient!

Customers served by AEP Texas are eligible to participate

Participating is simple! Follow these easy steps to start saving energy:

1. **Explore Eligible Products and Services:** Visit us at: <https://aeptxsaves.com>
2. **Choose Your Contractor:** Select a qualified contractor at: <https://aeptxsaves.com/residential-programs>
3. **Discuss Options:** Talk with your chosen contractor about pricing, warranties, and any services they offer.
4. **Review Costs and Agreements:** Understand all costs and terms of the agreement before signing anything.
5. **Request Documentation:** Ask for a copy of all paperwork related to your project for your records.
6. **Post-Inspection Notice:** AEP Texas may schedule a follow-up inspection to ensure the work meets our standards.
